WITH **FREE** © Sexxed™ SEMEN!**

**Free sexed doses of equal or lesser value. Valid from June 1 - July 31, 2017.
Not all sires are available as sexed and based on availability.
See your Genetic Advisor or www.westgen.com for details.*

WOULD YOUR DAIRY BENEFIT FROM SEXXED™ SEMEN?

- ☐ You want to expand your herd but you don't want the high expense of buying replacements.
- ☐ You don't have enough heifers to meet your needs.
- ☐ You are already, or would like to, sell heifers as an additional source of revenue.
- ☐ You want to consider a herd breeding strategy that helps you get more heifers from your best genetics.
- ☐ You operate a well-managed dairy with good conception rates.
- ☐ You want to use high-ranking sires (like Fortune & Outlast) not available in conventional straws.

**Your answer
is YES!**

If you checked **any**
one of the items!

GUIDELINES FOR USING SEXED SEMEN

- Fertility window for sexed semen is narrower because the sperm are believed to be closer in their timing for optimal fertility. This may result in a delay in the time of breeding by 4-8 hours compared to best practices when using conventional semen.
- Use on heifers with the appropriate weight, height and body condition.
- Use on heifers that are at the age (or younger) that translates to your targeted age at first calving.
- Try to breed heifers off natural heats (sync programs may be less reliable for heifers).
- When using sexed semen on lactating cows, select higher fertility cows that are healthy with good body condition.
- Sexed semen works well in combination with Semexai24™ / Heatime® or other activity monitoring systems.
- Many Jersey breeders opt to use sexed semen on their cows as a regular practice since Jerseys have high fertility and bull calves have a low value.

**Extra
Heifers**

OPPORTUNITY:

- HERD EXPANSION
- SELL EXTRA HEIFERS
- SELECTIVE BREEDING STRATEGIES
- Cull lower merit heifers based on genomic testing or parent averages
- Use lower merit heifers as recipients in ET program
- Breed lower merit heifers to beef sires
- Breed lower merit or problem breeder cows to beef sires - extra heifers to milking herd

Western Canadian Classic 2017

The 33rd Western Canadian Classic is set to take place from August 22-26th in Weyburn, Saskatchewan at the Weyburn Fairgrounds and Ramada Weyburn.

WestGen is pleased to continue our support of this very unique and highly regarded youth development program. If you're able to make it, we look forward to visiting with you there and can assure that you won't regret witnessing the passion and enthusiasm displayed by our future dairy leaders!

More information is available at

www.westerncanadianclassic.com

WCC 2017

Funds raised by province:

British Columbia	\$13,200
Alberta	\$4,200
Saskatchewan	\$700
Manitoba	\$2,200

Thank you!!!

Thank you from each 4-H Club member across Western Canada to all who purchased a Limited Edition "I support 4-H" camouflage hat. Together we raised \$23,000 in funds for your 4-H Dairy Clubs! With these funds 4-H can purchase new club shirts and jackets, fitting supplies for shows, travel to provincial events and more!

2017

WestGen is proud to host 4-H Family Fun Day!
We hope to see you there!

River Valley Farms

Semex's partnership with world renowned Jersey Breeders "River Valley Farms" has brought new life to our Jersey lineup. Branded by the 200HO10000 series stud code, our members now have access to a variety of new world class Jersey options.

River Valley Joyride (2014 GLPI, 48 GJPI, +14 Type) (*Rufus x Paramount*)

Joyride promises to be a bull that packages high production with superior type. At +1104 kgs milk with combined +98kgs fat and protein his daughters will be strong producers. Joyride has captured the style and conformation pattern of his dam who scores EX-95 USA, his proof points to a strong type pattern for Mammary Systems (+13) and Feet and Legs (+11).

DAM: FERMAR PARAMOUNT JOY, EX-95-USA

River Valley Circus Craze (1799 GLPI, 156 GJPI, +5 Type) (*Lemonhead x Pharoah*)

A new Sexed option, Circus is both Healthsmart and A2A2. He is a sire that River Valley Farms has extremely high hopes for. A bull that possesses a well-rounded, no holes proof coming from the Circus family; Craze combines great production (+1480 Kgs milk) with extremely balanced type and stellar health traits. Add Sexed Craze in to your programs to advance your herd today!

DAM: GOFF PHAROAH CIRCUS ACT-ET
EX-90-USA

Summer 2017 Mid-Release bulls

Six new Genomax sires become available in between the April and August proof runs. Of these six, four are Robot Ready™, and they possess a variety of attractive sires and pedigrees. **Woodcrest Def Manhattan** continues to demonstrate her potent transmitting capabilities adding two more high indexing sons to our lineup.

Woodcrest Def Manhattan

Progenesis Dockside (3417 LPI, 2697Pro\$, +12 Type) (Doorsopen x Defender)

Progenesis Dockside

The highest LPI Doorsopen son promises balanced, productive cows. A Robot Ready sire with big positive deviations for fat (+.31) and combined +161 kgs Fat and Protein. Delivering balanced type, well attached udders and moderate dairy strength. Dockside excels for Daughter Fertility (+108 DF) and delivers good health traits across the board.

Progenesis Montfort (3337 LPI, 2714 Pro\$, +11 Type) (AltaHotRod x Defender)

The higher Pro\$ brother to Dockside, Montfort comes from the same Def Manhattan cow. With impressive Protein deviations (+.23) and combined +185 kgs Fat and Protein this Robot Ready A2A2 sire offers great production. +11 for type with strong scores for Rear Attachment Width (+10) and Udder Texture (+10) will build sound, productive cows.

Progenesis Montfort

Claynook Charmer (3322 LPI, 2726 Pro\$, +10 Type) (Jedi x Mardi Gras)

The highest Pro\$ and TPI (2695) of our new mid-release additions, Charmer is an early Robot Ready Jedi son. From the powerful Larcrest Crimson cow family Charmer promises extreme production, +2266 kgs milk combined with +169 kgs Fat and Protein equals profit. With well attached udders, correct foot structure, low stature and lower rump angles, Charmer daughters will typify modern Holstein breeding.

Claynook Charmer

Morningview Dagger (3209 LPI, 2397 Pro\$, +11 Type) (Doorsopen x Uno)

A milk quality expert, with great fat production; Dagger's numbers appear most promising on the TPI index (2633). +.51 Fat deviation, and +10 for Mammary System demonstrate some of his strengths. Dagger excels in the functional trait category with +111 Herd Life, and an extremely low 2.33 Somatic Cell Score.

Endco Gemstone (3258 LPI, 2493 Pro\$, +13 Type) (AltaHotRod x St-Louis)

The highest conformation mid round addition to our lineup; Gemstone is another Rump Lowering (3L) and Thurl correcting (6A) sire. He offers soft, shallow and well attached udders that milk out fast (110 Milking Speed). From the Cookiecutter MOM Halo cow family comes another productive option for your genetic plans.

Hermosa Casanova (3234 LPI, 2358 Pro\$, +10 Type) (Kingboy x Uno)

Casanova is the highest Net Merit \$ (+755) of our new addition group of bulls, and is another bull that looks most attractive on the TPI Index (+2666). A Robot Ready option with solid production numbers: +1401 kgs milk, +80 kgs Fat and +57 kgs Protein. Casanova looks good for functional traits with his +110 Herd Life and +108 Daughter Fertility scores.

Fine Tune your herd's performance with Heatime PRO

Already widely proven and accepted as a heat detection and reproduction improvement tool, what else does SCR's Heatime Pro system have to offer?

With rumination monitoring you can set yourself up for the future. Monitoring rumination will give you an advantage over others, and make you a more efficient milk producer.

Benefits:

- **Fine tune feeding programs.** Monitor responses to feed changes before you see a drop or increase in the bulk tank.
- **Make your cow's time in the barn more efficient.** Track how time in the holding pen, or time spent in lockers affects your cows productivity. Real time rumination, eating and activity information give excellent indications to maximize your cows barn time.
- **Find sick cows faster.** Studies from Cornell University show that Heatime by SCR was up to 93% as effective, and up to 2 days faster at diagnosing illness than an intense every day fresh cow vet check including temperature, keto testing and palpation.
- **Track cow's responses to medication.** Watch a sick cow's recovery on her health graphs, or make changes to medications for cows not responding. Get cows healthy again, faster. Saving one or two liters of peak milk has massive payback implications over a complete lactation.
- **Reduce OvSynch costs.** OvSynch programs are costly. Putting cows on a program when they do not need it, the time cows spend locked up on shot days, and the lower conception rates between natural heats and OvSynch heats all add up to cost you money.

Take advantage of our whole herd pricing, and 0% financing offers!

Contact us for a demo or consultation on how rumination can work for you!

With a capitalization of \$5M, the WestGen Endowment Fund is a vehicle to support extension efforts, targeted research, youth development and other special projects that will be of benefit to cattle producers in Western Canada. The fund underscores WestGen's ongoing commitment to its producer members in helping them strengthen today's livestock industry.

New Projects funded in 2017:

2017 North Okanagan Holstein Club Youth Program	\$2,000
Delta Farm & Wildlife Trust - Day on the Farm	\$1,000
Jamie Sullivan - The effects of foot bath pH value on improved claw health	\$22,900
AgroMedia-Collection of hoof trim data in support of National Health Genetic Improvement Project	\$40,000 (2 years)
Jane van Asch - Breakfast on the Dairy Farm 2017 South Alberta	\$1,500
WestGen Education Scholarships	\$24,000 (3 years)
NODEAC - A day on a Dairy Farm	\$2,500
Creston Valley Fall Fair Association - Livestock Barn Flooring	\$5,000

Hidden Gems for Specialty Focus

It's easy to forget that through using a host of high-ranking young Genomax bulls in our breeding programs, the net result a few years later is some pretty awesome proven sires that can become reliable options to consider for further use. What's more, some very useful trait leaders emerge that provide excellent improvement on specific traits of focus. Here are a few examples of newly proven bulls that offer you reliable leadership that cannot be matched by any other Proven sires or Genomax sires.

Gen-I-Beq Aikosnow RDC Snowman x Baxter

We've introduced quite a number of Snowman sons to the proof sheet. Indeed he has been an excellent sire of sons for Semex regularly delivering tons of Milk improvement with nice Mammary Systems and exceptional Feet & Legs.

Still, there has been none quite like Aikosnow who combines to offer 207kg of Fat + Protein. With 118 kg Fat and 89 kg Protein, he is among the leader board for both traits. Bonus traits with Aikosnow include balanced overall Type, slightly wider and longer rear teats, slightly lower rump angle, reliable Calving Ability and red carrier status.

If you like cows that pay bills, he's hard to ignore!

Gen-I-Beq Aikosnow RDC

Summerliz Living - Epic x Man O Man

It's hard to find bulls that deliver more chest width than stature and while most people agree we don't need to make cows taller, lots of classifiers will tell you that chest width is something we need to focus on. Although no longer alive, we did decide to add Living back onto to the proof

Summerliz Living

sheet as the reigning breed leader (tied with two other bulls and one point higher than Doorman) for Dairy Strength. Living also distinguishes himself with his outstanding 115 rating for milking speed. Add wider rear teats, lower pins and Repromax status as additional reasons to consider this bull in your mating program.

Velthuis SGC Atmost - Atwood x Snowman

If you are looking for top-notch Feet & Leg improvement, you will be pleased to find Atmost, a bull sampled right here in western Canada who graduated with a +17 rating. This is significant because his outstanding +17 rating for Rear Leg Rear View is based on cows primarily evaluated in free stall settings. Atmost is nearly as good on Udder improvement with a +14 proof and boasts a sporty +16 on overall Type. What's extraordinary is he combines these numbers with a +2000kg milk rating! Again, a few bonus traits: he widens rear teats, is suitable for use on heifers and atypical of other Atwood sons, makes them moderate in size and stature.

Velthuis SGC Atmost

If you want to focus on improvement on specific traits like Combined Fat & Protein Yield, Dairy Strength, Feet & Legs, Milking Speed, or combined Fat & Protein Yield these are bulls that are the leaders and have the milking daughters to prove it.

Western Canadian Breeder's Club

What is it?

A self-funded breeder organization and network dedicated to help you increase the marketability of your herd.

How will the club help my farm?

- Expertise and advice on marketable matings for a broad marketplace.
- Herd Profiles and Breeder information on the upcoming Breeders Club landing page
- Assistance on effective farm websites and special pricing on new, easy to maintain website options provided through WestGen.
- Providing knowledge sharing opportunities through the network of breeders and club events.
- The club will actively pursue and tour potential international marketers and buyers for its members.
- The club will partner with respected marketers such as HolsteinForum.de to try to bring business to its members.

What else do I need to know?

The club is funding its efforts with a membership fee of \$250/yr. The club has already networked local breeders to international buyers through its marketing contacts. The first Western Canadian Breeders Club embryo shipment is in transit overseas at press time.
